## SUMMARY

---

Final-year IT student with experience in full-stack development, MERN applications, and modern web technologies. Focused on building secure, scalable, and user-friendly software systems.

## PROJECTS

---

### Full Stack Food Delivery Website

[Link](#)

- Built a complete MERN-based food ordering platform with secure JWT authentication.
- Developed structured REST APIs and integrated Stripe for smooth and reliable payments.
- Created a React-powered admin dashboard for item management and order tracking.

### SkillScoreAI – ML-Based Recommendation Tool

[Link](#)

- Developed a Flask and scikit-learn driven system for accurate career predictions.
- Implemented a dual-model engine combining Random Forest and rule-based fallback logic.
- Added user authentication, recruiter search, and a clean, responsive user interface.

### Hospital Management System

[Link](#)

- Built a JavaFX desktop application integrated with MySQL using JDBC connectivity.
- Implemented structured CRUD workflows for managing patient and staff data.
- Ensured stable database operations with proper validations and error handling.

## WORK EXPERIENCE

---

### Web Development Intern — ShadowFox

July 2025

- Built responsive and accessible web pages using HTML, CSS, and JavaScript.
- Applied Flexbox/Grid layouts and optimized assets for better loading performance.

### Web Development Intern — SkillCraft Technology

July 2025

- Developed reusable React components with organized and maintainable state management.
- Added UI features and fixed frontend bugs to enhance overall user experience.

## EDUCATION

---

2022 - 2026	B.E. Information Technology - University of Mumbai	(GPA: 7.64)
2022	Class 12th - MH State Board	(64%)
2020	Class 10th - MH state Board	(87.4%)
2025	Web Development Course - Udemy	

## SKILLS

---

Languages	Java, Python, JavaScript (ES6)
Full Stack	React.js, Node.js, Express.js, HTML5, CSS3
Databases	SQL, MongoDB
Tools	Docker, Git, GitHub, VS Code
